

Poldina _Wall

Poldina is a rechargeable battery-powered cordless wall lamp, available in two versions. A "touch" control on the head allows switching on/off, dimming, and selecting the color temperature of the light (2200 K, 2700 K or 3000 K). It is suitable for both indoor and outdoor use. An electronic control system monitors the remaining autonomy and ensures a constant luminous flux until the battery runs out. Recharging is therefore optimized and always properly done. The lamp comes with a USB Type-C cable for recharging; the battery charger is included. It can be customized with a ceramic cover, to be purchased separately
